

In operation

In planning or test phase

Heat source

- Ambient air
- Water bodies (Lakes, rivers, seas)
- Pit water
- Waste water and sewage treatment plants
- Servers and data centres
- Deep geothermal energy
- Waste heat
- Various heat sources
- No information on heat source

Thermal output

- No information
- 50 MW
- 100 MW
- 150 MW
- 200 MW
- 250 MW
